

Directions:

Color the Life Cycle

Color each stage of the firefly life cycle on your bottom circle. Take your time and do your best work!

· **Cut Out the Circles**

Carefully cut out both circles:

- The life cycle circle
- The cover circle with the missing “window” section

· **Stack the Circles**

Place the cover circle **on top** of the life cycle circle. Make sure the edges line up.

· **Poke a Hole in the Center**

Use your pencil to gently poke a hole through the center of both circles.

· **Add the Fastener**

Push the brass fastener through the hole and open the ends in the back to hold the circles together.

· **Spin and Learn!**

Turn the top circle to see one stage of the firefly life cycle at a time through the window.

Did you know fireflies have their own website?
